

Constructed and recertified by:

Dr. Erwin K. Hoffelner

Consulting engineer for technical chemistry

Environment, factory equipment right and occupational safety

Dates of factory equipment:

BRUCHA GesmbH, Werk Michelhausen

A-3451 Michelhausen, Rusterstraße 33

Responsible for execution: Helmut Eichberger/purchasing department

Purpose of the factory equipment:

Manufacturing of sandwichpanels made out of steel-layer and polyurethane or mineral wool core.

The sandwichpanels are used for roof, wall and facade – partly also for fire protection for the industrial cold store and industrial constructions.

Waste owner no.: 9008390517543

The registration within the EDM-Portal under www.abfallregister.at has been effected.

Waste relevant processes:

Sandwichpanel-production mineral wool and polyurethane rigid foam:

- Metal sections
- Packaging rest
- Wooden expendable pallet
- Mineral wool
- Polyurethane rigid foam

The following waste management companies take the waste material from the BRUCHA production and are verified by the EDM-Portal of the Federal Environmental Office.

PKM-Muldenzentrale GmbH GLN-Nr. 9008390006429 and Johann Schütz GmbH GLN-Nr. 9008390037553

The following waste-economical measures are implemented in our company:

- separated collection of secondary materials and residual waste
- in-house recycling of polyurethane panels for floor insulation
- employee training: Organisation and cleanliness at the collecting point
- Identification of the collecting points/containers.
